

TESTIMONIAL FOR DR NIAMTU

Dr Niamtu changed my life for the better! I can't sing the praises of this gifted surgeon and his gorgeous staff at *'Love That Face'* in Richmond enough!

I flew all the way from Australia to have a deep plane facelift with Dr Niamtu, because I wanted the best surgeon who had had consistently brilliant results. I deliberated over surgeons for a long time. Dr Niamtu's work really stood out to me. He had done (I hope I remember this correctly) over 1600 face lifts. And while I knew he was incredibly experienced, I was delighted to discover he is a fantastic, warm-hearted human being too.

Dr Niamtu's aim is to make you look your best younger self. It's a very natural look he goes for. Exactly what I wanted. Post surgery, I look FANTASTIC, years younger than my age - radiant and attractive. Men all over the place notice me. I know it's not the point, but it's a good metric to understand the change/improvements by.

Dr Niamtu's excellent deep plane facelift exceeded my expectations in so many ways. Most notably, it's given me a new lease on life. I look the age I feel. And I have much more social confidence now. This is an incredible gift, more than worth the financial and physical costs of this surgery and travel.

I admit I was deeply terrified coming in, because I didn't know if I would like the results. And because I was doing it all alone. But in truth, the surgery was far easier than I thought it would be! And Richmond is the most delightful and gorgeous small city to live in. Plenty of parks and theatre to recover around and beautiful food.

I was watched over in recovery for the first 24 hrs by a fabulous nurse recommended by the staff at Dr Niamtu's surgery. And I soon moved to a lovely airbnb and stayed in Richmond for 3 weeks, really because I was loving it so much.

The recovery I believe was very short. It certainly was painful/distressing for a small amount of time, but only for about three days. You come out very swollen, and that's a shock even if you've prepared for it. At this stage you may have trepidation about the face lift because you can't see nor imagine the final result. Panic can ensue. But patience my friend!!! Recovery in retrospect is so very fast. With in two weeks, I could see where the shape was heading, and how great it was going to be. Much swelling gone.

Two months after the surgery, I am fully healed and beyond happy with the results. My beautiful face emerged from the swelling, just as Dr Niamtu designed it to.

I am now in my mid fifties, and glad I did it now and not later. My skin is still young and plump. I know this has given me at least 10 years or more of a fantastic youthful face.

The procedure certainly cost me more than it would have cost me to do in Australia with our exchange rate and other expenses - but I just thought, if you're going to do it, do it properly!! And now I know I made the right decision for my face.

As you are going through the worst bit of it, my best advice is just relax, be patient. Don't endlessly look in the mirror. Just think - I'm waiting three weeks before judging.

In the months after, you will find some parts of your face will be tight. They will slowly untighten over time. You may also get little pin pricks. I could count them on one hand, but it is a strange sensation. Eitherway, it all fades. I am doing face yoga now, and my face feels great.

I have a deep affection for Dr Niamtu and his team of lovely women. It's a warm welcoming surgery. They are kind people and they want you to have the best experience and to live your best life. I felt in safe hands with them.

To Dr Niamtu and the whole team - thank you, thank you, thank you! You've given me a whole new life - and I truly LOVE THAT FACE!
